

# EnduroShield

Up to 90% Less Cleaning

## BATHROOMS:

### ENDUROSHIELD® PROTECTION

EnduroShield® is a permanent non-stick, protective coating for use on all glass, tile, grout and porcelain surfaces. Using state of the art nanotechnology, EnduroShield acts as a permanent shield to seal the porosity of the surface, allowing contaminants to reside on an easy to clean protective coating. The invisible coating, which is only two molecules thick, prevents contaminants from soaking into the surface protecting against staining and etching. The superior protection reduces the build up of mould and harmful bacteria, helping to promote a germ free environment, making it an ideal solution for bathroom surfaces.

### APPLICATION

EnduroShield® is ideal for use on all glass, tile, grout and porcelain surfaces. The once only application makes dirt, soap scum and grime easier to clean by up to 90%.

### HOW TO APPLY

EnduroShield® can be applied in factory to the glass panels, tiles and ceramics before installation or in situ by certified applicators. The product is a clear liquid that is sprayed on, and polished into the surface, creating a permanent bond. Application comes complete with a 10 year warranty when applied to new glass, or 3 years when applied to existing glass and all tiles, grout and ceramic surfaces.

### FEATURES & BENEFITS

**Once only application: permanently bonds to the surface**  
EnduroShield® is not a traditional coating that sits on the surface, but chemically bonds, becoming a permanent extension to the surface.

**Protects against corrosion and etching from contaminants**  
Untreated surfaces are porous and as a result, absorb contaminants and pollution which cause deterioration and discolouration. The deterioration of the surface makes cleaning more frequent and more difficult. EnduroShield® seals the porosity of the surface helping prevent the deterioration caused by etching and corrosion. As a result the time and frequency of cleaning is reduced.

**Maintenance costs are significantly reduced**  
EnduroShield® creates a permanent non-stick coating which greatly reduces the time spent cleaning. It also limits the need for harsh chemicals and assists in reducing the build up of mould and harmful bacteria further reducing maintenance costs.

**Works on all bathroom surfaces**  
EnduroShield® is suitable for application to almost all bathroom surfaces. EnduroShield® for Glass is effective on all glass surfaces including shower screens and bathroom mirrors. EnduroShield® for Tiles & Grout is ideal for use on all wall and floor tiles, shower recesses, and ceramic vanities, toilets and baths.

### SPECIFICATION

EnduroShield® continues to be specified by leading architects for application on both residential and commercial developments to protect surfaces and reduce maintenance time for clients. Recent specifications include major bathroom refits to major hotels in the hotel industry.

"I am happy to endorse EnduroShield™ as I bought it and tested it on my own shower screens before deciding to write a story in the West Australian Times.

I do not endorse products that I have not tried, and we were delighted with the results!"
