

# EnduroShield

Up to 90% Less Cleaning

## SANDBLASTED GLASS:

### ENDUROSHIELD® PROTECTION FOR GLASS

EnduroShield® for Sandblasted Glass is a permanent non-stick, protective coating for use on all sandblasted glass surfaces. Using state of the art nanotechnology, EnduroShield acts as a permanent shield to seal the porosity of the glass, allowing contaminants to reside on an easy to clean protective coating. The invisible coating, which is only two molecules thick, creates a barrier protecting the surface against staining, etching and fingerprints, making it an ideal solution for all sandblasted glass installations.

### APPLICATION

EnduroShield is ideal for use on all glass surfaces. The once only application makes dirt and grime easier to clean by up to 90%.

Suitable for:

- Shower Screens
- \* Balustrading & Pool Fencing
- \* Windows & Doors
- \* Glass Partitions
- \* Kitchen Splashbacks
- \* Artistic Glass
- \*

### FEATURES & BENEFITS

#### Once only application: permanently bonds to the glass

EnduroShield is not a traditional coating that sits on the glass, but chemically bonds, becoming a permanent extension to the surface.

#### Resists fingerprints and staining

EnduroShield keeps sandblasted glass surfaces looking new by protecting the surfaces against the problems of staining and fingerprinting which are so common with sandblasted glass.

#### Protects against corrosion and etching from contaminants including soap scum and lime scaling

Untreated glass is porous and as a result, it absorbs contaminants and pollution which cause deterioration and discolouration. The deterioration of the surface makes cleaning more frequent and more difficult. EnduroShield seals the porosity of the glass helping prevent the deterioration caused by etching and corrosion. As a result the time and frequency of cleaning the glass is reduced.

#### Maintenance costs are significantly reduced

As EnduroShield creates a permanent non-stick coating which greatly reduces the time spent cleaning; maintenance costs can be reduced. EnduroShield also protects the glass from staining and etching, eliminating the need for expensive glass restoration or replacement of panels.

### SPECIFICATION

EnduroShield continues to be specified by leading architects for application on both residential and commercial developments to protect the glass surfaces and reduce maintenance time for clients.

### HOW TO APPLY

EnduroShield can be applied in factory to the glass panels before installation or in situ by certified applicators. The product is a clear liquid that is sprayed on, and polished into the glass, creating a permanent bond.

Application comes complete with a 10 year warranty when applied to new glass, or 3 years when applied to existing glass.
